

THE PROBLEM

Cebu's job market is broken in three ways.

1 ISSUE 01
Unemployment

Qualified seekers blast generic CVs into the void. Listings exist. Applicants exist. The bridge between them does not.

2 ISSUE 02
Overqualification

Talent ends up in roles far below their skill ceiling. Wages stagnate. Growth stalls. Skills decay from disuse.

3 ISSUE 03
Underutilized AI

AI is everywhere — except where it could matter most. Local hiring still runs on keyword luck instead of meaning.

WHO IT SERVES

Four roles. One platform.

1 JOB SEEKER

As a job seeker, I want to:

- Upload my CV once and get matched.
- See openings that actually fit my skills.
- Ask an AI advisor to tailor my resume.

2 EMPLOYER

As an employer, I want to:

- Post a role and get a talent shortlist.
- Filter by real fit, not keyword games.
- Reach Cebu-based talent fast.

3 GOVERNMENT

As Government (PO Cebu), I want to:

- Track the service for residents in-person.
- Own the data and protect privacy.
- Report on real labor outcomes.

4 DEVELOPERS

As Developers, I want to:

- Monitor and tune the matcher engine.
- Keep the system offline and available.
- Plug updates without cloud dependencies.

WHY THIS MATTERS

Cebu City is already *moving*.

The local government has rolled out concrete initiatives to close the unemployment gap — Scratch Match plugs directly into that effort.

INITIATIVE 01
PO Job Caravans

Learn from door-to-door, connect with employers on-site. Set up a network of support and training for job seekers.

INITIATIVE 02
Cebu IT-SPM Push

Skills and training for the future workforce. Invest in training and skills development for the workforce.

INITIATIVE 03
TESDA Skills Training

Learn from TESDA, get skills training, and get a job. Set up a network of support and training for job seekers.

INITIATIVE 04
Barangay Livelihood Hubs

Support and training for the future workforce. Invest in training and skills development for the workforce.

PROCESS

Sticky note — system.

Hand-drawn sketches and flow diagrams that shaped the build.
