

POSTED MAY 2026

Halcyon Cloud

Site Reliability Engineer

Cloud infra startup · 22 employees

LOCATION

Cebu IT Park · Remote-friendly

TYPE

Full-time · Permanent

SALARY

₱110,000 – ₱160,000 / month

REFERENCE

HC-SRE-2026-019

ABOUT THE ROLE

We run Kubernetes for SMB SaaS customers across Southeast Asia. We are looking for an SRE who has been on call before and prefers postmortems to blameless email chains. Quiet, technical, paid well. Two open headcounts.

RESPONSIBILITIES

- › Own the on-call rotation alongside three other SREs.
- › Improve our internal Kubernetes platform (~40 customer clusters).
- › Drive incident reviews; write postmortems people actually read.
- › Reduce alert noise. Ruthlessly.

WHAT WE'RE LOOKING FOR

- › 4+ years of production SRE / DevOps experience.
- › Operational fluency in Kubernetes, Terraform, and one cloud provider.
- › Strong scripting in Go or Python.
- › History of being on call without burning out.

NICE TO HAVE

- › Authored or co-authored an open-source operator or controller.
- › Experience running multi-tenant Postgres at scale.

PERKS & BENEFITS

- ✦ ₱40k yearly conference and learning budget.
- ✦ On-call work counts as work; you get the time back.
- ✦ Premium HMO including parents.
- ✦ Annual team off-site (last year: Siquijor).

HOW TO APPLY

Submit CV and one short writeup of a real incident via the Scratch Match portal.
