

POSTED MAY 2026

Sinulog Studios

Mid-Level Full-Stack Engineer

Cebu-based product studio · 42 employees

LOCATION

Cebu IT Park · Hybrid (3 days on-site)

TYPE

Full-time · Permanent

SALARY

₱65,000 – ₱90,000 / month

REFERENCE

SS-ENG-2026-014

ABOUT THE ROLE

We build internal tools for Cebu SMBs. Boring problems, modern stack, real users. Looking for a full-stack engineer who can own a feature end-to-end and ship without a babysitter. Most days are quiet, focused, and free of meetings.

RESPONSIBILITIES

- › Own one product surface end-to-end: spec, build, ship, monitor.
- › Work directly with two designers and the founder on weekly priorities.
- › Write clear PRs, leave clear review comments, mentor a junior every quarter.
- › Carry the on-call rotation roughly one week every two months.

WHAT WE'RE LOOKING FOR

- › 3+ years building production web apps in React or similar.
- › Comfort with both frontend and a typed backend (Node/TS or Python).
- › Read-the-postgres-logs fluency, not just ORM-only.
- › Ability to estimate honestly and disagree well in writing.

NICE TO HAVE

- › Prior work at a Cebu-based product company.
- › Experience with Next.js app router and Server Actions.
- › Open-source contributions (any size).

PERKS & BENEFITS

- ✦ HMO from day one (you + two dependents).
- ✦ ₱20k yearly learning budget, no approval needed.
- ✦ Compressed 4.5-day workweek (Friday afternoon off).
- ✦ Free coffee, real coffee, made by an actual barista.

HOW TO APPLY

Submit CV through the Scratch Match portal · ref SS-ENG-2026-014
