A. REVISION HISTORY

Version	Effective Date	Summary of Changes	Author
0.1	29-April-2026	Initial UAT scenario draft	John Andre Yap

1. OVERVIEW

This document presents a UAT Scenario Outline for Scratch Match: The AI-Assisted Job Matcher, a locally-bound employment matching system for Cebu, Philippines. The system is currently at the wireframe and sample-data prototype stage.

Scenarios cover the core implemented modules - Authentication, Seeker Profile and CV Management, Job Search, AI Matching, Employer Job Posting, Candidate Discovery, and the Admin Panel - as well as two planned features: the RAG Pipeline (Qdrant + nomic-embed-text) and Local LLM Integration (Mistral 7B via Ollama). All scenarios are scoped to what the prototype can demonstrate with sample data.

2. UAT SCENARIO OUTLINE

2.1 AUTHENTICATION

Registration, login, and session management for all roles.

2.1.1 Registration and Login

UAT S/N	Module Category	Scenario	Role
AUTH-001	Authentication	Register as a Job Seeker with a valid email and password	Scratch Match Seeker
AUTH-002	Authentication	Register as an Employer with a valid email and password	Scratch Match Employer
AUTH-003	Authentication	Attempt registration with an email already in use - system shows an error	Seeker / Employer
AUTH-004	Authentication	Login with correct credentials - user is redirected to dashboard	Seeker / Employer / Admin
AUTH-005	Authentication	Login with wrong password - error shown, user not authenticated	Seeker / Employer
AUTH-006	Authentication	Logout clears the session and redirects to the login page	Seeker / Employer / Admin

2.2 SEEKER PORTAL

Features accessible after a Seeker completes onboarding.

2.2.1 Profile and CV Management

UAT S/N	Module Category	Scenario	Role
SPROF-001	Seeker Profile	Complete onboarding form with name, location, and specialization	Scratch Match Seeker
SPROF-002	Seeker Profile	CV upload is blocked until the seeker profile is complete	Scratch Match Seeker
CVS-001	CV Management	Upload a PDF CV with a specialization label	Scratch Match Seeker
CVS-002	CV Management	Delete a CV - record removed from SQLite and Qdrant	Scratch Match Seeker
CVS-003	CV Management	Attempt to exceed the CV limit - system blocks and shows limit message	Scratch Match Seeker

2.2.2 Job Search and AI Matching

UAT S/N	Module Category	Scenario	Role
SJOB-001	Job Search	Browse and view details of open job postings	Scratch Match Seeker
SJOB-002	Job Search	Search jobs by keyword - results filter correctly	Scratch Match Seeker
MATCH-001	AI Matching	Request job matches for a CV - system returns a ranked list with scores	Scratch Match Seeker
MATCH-002	AI Matching	Two different CVs for the same user return different match rankings	Scratch Match Seeker
MATCH-003	AI Matching	CV with no matching jobs displays an empty state	Scratch Match Seeker

2.2.3 AI Advisor Chat

UAT S/N	Module Category	Scenario	Role
SCHAT-001	Seeker AI Chat	Ask 'Which jobs fit my CV?' - response cites actual Cebu listings	Scratch Match Seeker
SCHAT-002	Seeker AI Chat	Ask advisor to tailor CV for a role - response references the job description	Scratch Match Seeker
SCHAT-003	Seeker AI Chat	Chat history persists within a session - context carries across turns	Scratch Match Seeker

2.3 EMPLOYER PORTAL

Features accessible after an Employer completes onboarding.

2.3.1 Job Posting

UAT S/N	Module Category	Scenario	Role
EJOB-001	Job Posting	Post a new job with title, description, requirements, and salary	Scratch Match Employer
EJOB-002	Job Posting	Newly posted job appears in the seeker job listing	Scratch Match Employer
EJOB-003	Job Posting	Close a job posting - it disappears from seeker listings	Scratch Match Employer
EJOB-004	Job Posting	Delete a job posting - Qdrant chunks for that job are also removed	Scratch Match Employer

2.3.2 Candidate Discovery and AI Assistant

UAT S/N	Module Category	Scenario	Role
ECAND-001	Candidate Search	View ranked candidate CVs for an open job	Scratch Match Employer
ECAND-002	Candidate Search	Record a match - seeker contact email becomes visible	Scratch Match Employer
ECHAT-001	Employer AI Chat	Ask assistant to find candidates for a job - response summarizes matching CVs	Scratch Match Employer
ECHAT-002	Employer AI Chat	Chat history persists within a session	Scratch Match Employer

2.4 ADMIN PANEL

Admin account is seeded during setup. No public admin registration.

2.4.1 User and Content Management

UAT S/N	Module Category	Scenario	Role
ADMIN-001	Admin	Login to the admin console with the seeded admin credentials	Scratch Match Admin
ADMIN-002	Admin	View the full user list and deactivate an account	Scratch Match Admin
ADMIN-003	Admin	Delete a job posting - Qdrant chunks are also removed	Scratch Match Admin
ADMIN-004	Admin	Delete a CV - record removed from SQLite and Qdrant	Scratch Match Admin

2.5 RAG PIPELINE AND LOCAL LLM

Planned features validated end-to-end with sample data: Qdrant + nomic-embed-text for retrieval, Mistral 7B via Ollama for generation.

2.5.1 Ingestion and Retrieval

UAT S/N	Module Category	Scenario	Role
RAG-001	RAG Pipeline	CV upload triggers chunking and embedding - Qdrant point count increases	Scratch Match Seeker
RAG-002	RAG Pipeline	Job posting triggers the same chunk-and-embed pipeline	Scratch Match Employer
RAG-003	RAG Pipeline	Semantic match returns a different ranked list for two different CVs	Scratch Match Seeker

2.5.2 Local LLM

UAT S/N	Module Category	Scenario	Role
LLM-001	Local LLM	AI advisor responds without calling any external API or cloud service	Seeker / Employer
LLM-002	Local LLM	Response streams progressively in the UI rather than appearing all at once	Seeker / Employer
LLM-003	Local LLM	If Ollama is not running, chat shows a clear error instead of hanging	Seeker / Employer
