CIS 2205: DESIGN PROJECT

Post-Exhibit Reflection and Refinement Report

TEAM NAME: _____

MEMBERS:

1. _____

2. _____

3. _____

DATE: _____

INSTRUCTOR: <Replace the current name of your instructor>

Table of Contents

1. Executive Summary	
2. Feedback Organization (Raw Data)	
3. Feedback Categorization	
4. Thematic Analysis and Trends	
5. Evaluation Against Original Design	
6. Refinement and Prototype Strategy	
7. Conclusion	

1. Executive Summary

Provide a high-level overview of your project's performance during the booth exhibit.

Summarize the general reception of your prototype and the primary goal of this refinement document.

2. Feedback Organization

Collect all raw data from your exhibit (surveys, interview notes, etc.) into a central spreadsheet. Provide a summary or link to the organized data here.

3. Feedback Categorization

Sort the raw feedback into the five main buckets as discussed in the guidelines.

USABILITY	DESIGN	FUNCTIONALITY	CONTENT CLARITY	TECHNICAL

4. Thematic Analysis and Trends

Identify common patterns. Look for frequently repeated feedback, positive highlights, and outlier suggestions.

4.1 Frequently Repeated Feedback Table

THEME / TREND	# OF MENTIONS	FEEDBACK SUMMARY
e.g. Visual Accessibility	6	font sizes being too small or color contrast making text difficult to read
e.g. Feature Requests	<how many mentions?>	<replace actual feedback summary>
e.g. Content Clarity	<how many mentions?>	<replace actual feedback summary>
e.g. Navigation Friction	<how many mentions?>	<replace actual feedback summary>

4.2 Ranking of Focused Feedback

Based on the identified frequently repeated feedback (**4.1 Frequently Repeated Feedback Table**), rank the feedback based on the order of Mentions, and highlight the **top 3** that has the greatest number of mentions and that will be the basis/focus on working with the improvements.

Rank #	THEME / TREND	# OF MENTIONS	FEEDBACK SUMMARY
1	e.g. Visual Accessibility	6	font sizes being too small or color contrast making text difficult to read
2	e.g. Feature Requests	<how many mentions?>	<replace actual feedback summary>
3	e.g. Content Clarity	<how many mentions?>	<replace actual feedback summary>
4			
5			

In this area, Explain/Expound further the ranking and your findings to help the readers/audience understand the context.

5. Evaluation Against Original Design

- Navigation: _____
- Readability/Typography: _____
- Instructional Clarity: _____
- Responsiveness: _____
- Accessibility: _____

6. Refinement and Prototype Strategy

6.1 Insights for Improvement

FEEDBACK AREA	ACTIONABLE REFINEMENT	PRIORITY (H/M/L)

6.2 Final Refinement Summary

- Elements to Retain: _____
- Elements to Revise: _____
- New Ideas to Implement: _____

7. Conclusion

<Provide conclusion, reflection and general plans for the improvement of the “as-is” prototype to have better version of the your “to-be” prototype.>
